WinTOX 6 Total Laboratory Management

WinTOX 6 laboratory information management system incorporates the expertise of laboratory professionals, as well as the knowledge gained from field use in 35 states, including the District of Columbia. Designed specifically for the toxicology laboratory, WinTOX streamlines the workflow of the laboratory, expediting the exchange of client information and drug test results with off-site facilities, treatment centers and other members of the criminal justice system. The full integration of *Order Entry*, *Results Approval*, and *Reporting* enables lab professionals to quickly and easily manage all phases of required testing.

WinTOX 6 As Easy As 1, 2, 3:

1. Order Entry

- ◆ Web-based for local or internet program access
- ◆ User-friendly interface and intuitive design
- ◆ Optional modules for remote order entry and random drug screening

2. Approve Results

- ◆ Multiple review options
- ◆ Automatic reflexing

3. Report

- ◆ Automatic reporting of results to clients
- ◆ Full integration with the iMs Court Ordered Treatment Tracking System (COTTS) for prompt transmittal of drug screen results
- ◆ Optional modules for online results and reporting

Whether handling the workload of small laboratories or thousands of specimens per day, WinTOX is the only laboratory information management system that you will ever need.

Who May Benefit?

- ◆ Drug Testing Laboratories
- ◆ Parole and Probation Programs
- ◆ Drug Courts
- ◆ Correctional Facilities
- ◆ Police & Sheriff Departments
- ◆ Employer Reference Laboratories

Provides Full Integration of Laboratory With:

- ◆ Outside Laboratories
- ◆ Off-Site Facilities
- ◆ Treatment Centers
- ◆ Third-Party Providers

The screenshot shows the WinTOX 6 Order Entry Screen. The main form is for entering specimen information. It includes fields for Donor ID (013090), Donor Name (Chief, Joseph), Entered date (01/03/2008), and Collector (Iva). There are also fields for Existing Specimen ID, Alternate Specimen ID, Control Number, and Case Number. The form includes dropdown menus for Agency (WinTOX Online), Subagency (DrugSmart - DrugSmart), and Rec. Party (Test.RP.DS - Test.RP.DS). There are also fields for Specimen Comment 1, Specimen Comment 2, and Order Comment. A section for Prescription Drugs Taken and Non-Prescription Drugs Used is also present. The interface includes a search box, a list of available donors, and a table of previous results.

Specimen	Date	Result
2573	07/24/2008	Negative
2567	07/15/2008	Negative
2560	07/15/2008	Negative

2530	03/24/2008	Negative
2524	02/27/2008	Negative
2516	02/22/2008	Negative
2495	01/23/2008	Negative
2494	01/16/2008	Negative
2493	12/20/2007	Negative

Product Features

Highlights and Benefits

Browser-Based	Operates on a single computer, an internal network, or over the internet.
Administrator Definable Setup	Customized screen view, program data, and operations are enabled by individual user's roles and permissions.
Configurable Workflow	Operates in customer defined workflow setups. Laboratories can configure processes such as group order, batch order, collection systems, or receiving systems as desired.
Default Orders	Enables the user to quickly recall standing orders within the WinTOX system.
Batching	Allows grouping of specimens into batches for order processing and testing.
Barcode Generation	Creates unique specimen barcodes at order entry for identification of specimen by the instrument or chain of custody.
Chain of Custody (COC)	Includes a COC form with barcode labels, signature banks, and tear-off information sections that meet compliance requirements and lab data requirements.
Report Delivery	Provides automatic reporting of results through various methods: <ul style="list-style-type: none">✦ Local and network printers✦ Dialup access to network reports✦ Remote workstation viewing and printing✦ Custom Designed Queries✦ Auto batch faxing✦ Email reporting✦ Configurable for each requesting party
Quantitative & Qualitative Results	Reports assay quantitative or qualitative results based on user preference.

Optional Modules

Random Drug Screening	Automatically generates the complex random drug testing schedules for donors or groups of donors and sends the orders directly to WinTOX.
Interface to External Billing Systems	Interfaces for corporate, agency, local, county, and state data management systems.
Direct iMs Court Ordered Treatment Tracking System (COTTS) Interface	Integrates toxicology lab, court, and case data management systems.
Color Badge ID Printing System	Online Photo ID system and plastic bar coded badge IDs for positive client identification and rapid order entry with hand-held scan of Photo ID badge.
Remote Order Entry & Reporting	Allows users to create orders and view results from remote collection sites via the internet.
On-Line Result Reporting	Allows agencies or individuals to view test results via the internet.
